

Safety Education Assessment

The Safety Education Assessment requirement will be met once you successfully complete the assessment that you will find at the website listed below. You will need to read information concerning various safety education topics and respond appropriately to questions related to each topic. Once you successfully answer the questions on one topic you will then be allowed to proceed to the next. If you need to leave the assessment prior to answering all the questions, you may return to this assessment at the point where you left off. All your correct responses will be saved. Once you successfully complete this assessment your Teacher Education Requirement Screen on ICampus should be updated the next day.

Successful completion of this assessment will fulfill Illinois Senate Bill 0395 that requires all teacher candidates to have instruction in safety education.

The safety examination is available through the following secure Web site address: <https://itps.ais.ilstu.edu/project/>. Click on the test you would like to take. You will need to use your ULID for the user name and your ISU email password for the password.
